Education

Graphic Era Hill University, Dehradun **2023 – 2027 (Expected)**
B.Tech in Computer Science (Artificial Intelligence and Machine Learning) *CGPA: 7.48/10*

Army Public School, Dehradun **2023**
Class XII (Senior Secondary)

Army Public School, Dehradun **2021**
Class X (Secondary)

Work Experience

Software Engineering Intern **Mar 2026 – May 2026**
Peerprep

- Engineered a document detection and perspective-correction pipeline using Python and OpenCV to digitize marksheets across multiple education boards.
- Deployed the pipeline to production, reducing per-record processing time from 10 minutes to approximately 30 seconds (20x faster), with 99.98% extraction accuracy.

Technical Operations & System Reliability Intern **Jan 2025 – Feb 2025**
Deepali Designs & Exhibits Pvt. Ltd. – 38th National Games *Dehradun, India*

- Deployed a QR-based accreditation and data management system using MySQL across 15+ event venues.
- Maintained 99.9% uptime for CMS-based event platforms and optimized verification workflows.
- Troubleshot QR, API, and cloud synchronization issues in real time with cross-functional event teams.

Projects

CampusHub – Full-Stack Student Services Platform (Team Lead) | *Java 21, Spring Boot, PostgreSQL, JWT, REST APIs, Git* **Jan–Mar 2026**

- Led architecture and backend development of a multi-service platform for student PG housing, mess plans, and grocery services.
- Designed a 14-table PostgreSQL schema normalized to BCNF, with targeted denormalization for read-heavy listing endpoints.
- Built 58 REST API endpoints with JWT authentication, refresh-token rotation, and role-based access control.
- GitHub: github.com/099Aditya/CampusHub

DOC-OC – Automated Marksheet Extraction System | *Python, FastAPI, YOLO, Table Transformers, React.js, MySQL* **Sep–Oct 2025**

- Built a document parsing pipeline using YOLO for layout detection and HuggingFace Table Transformers for structured field extraction.
- Developed an asynchronous FastAPI backend and React.js frontend for real-time extraction results; deployed to production at Peerprep.
- GitHub: github.com/099Aditya/DOC-OC

Cargo Laytime – Maritime SOF Document Processing | *Python, FastAPI, Google Cloud Document AI, GenAI* **Jul–Aug 2025**

- Won 1st place at the MariTHON National Hackathon by building a GenAI-powered engine to extract structured Statement of Facts events.
- Reduced manual calculation time by 50%, with 100% accurate laytime estimates; deployed by the Integrated Maritime Exchange.
- GitHub: github.com/099Aditya/IME-MariTHON

AI-Driven Dynamic Credit Limit Optimization | *PyTorch, Double DQN, FastAPI, Reinforcement Learning, n8n* **Jan–Mar 2026**

- Reached the finals of HackTheWinter National Hackathon with an offline Double DQN policy for risk-adjusted profit optimization.
- Built a FastAPI gateway handling 5,000+ evaluations/minute with sub-second latency, risk below 7%, and 8% improved spending efficiency.
- GitHub: github.com/099Aditya/Credit-Limit-Adjust-RL

Technical Skills

Languages: TypeScript, Java, Python, SQL, C/C++
Frameworks & Libraries: React.js, Spring Boot, FastAPI, OpenCV, YOLO, PyTorch
Databases: PostgreSQL, MySQL, MongoDB; Database Design and Optimization
Developer Tools: Git, GitHub, Docker, Postman, Google Cloud AI, AWS, n8n
Coursework: Data Structures & Algorithms, Object-Oriented Design, Operating Systems, Complexity Analysis

Certifications & Participation

- **OpenHack 2025 – IISc Bangalore** Apr 2025
  Foundation for Science, Innovation and Development, IISc Bangalore Credential
- **RoboMaster ELITE Set – Robotics Quiz** Jun 2025
  Unstop – GEHU Dehradun Credential
- **RoboMaster: International Robotics Championship** Jun 2025
  Certificate of Participation – Unstop Credential
- **AWS Jam Event – Graphic Era University**
- **38th National Games – Internship Certificate** Jan 2025 – Feb 2025
  Axepert Exhibits Private Limited

Honours and Awards

- **1st Place – MariTHON National Hackathon** (Cargo Laytime, 2025)
- **Finalist – HackTheWinter National Hackathon** (Credit Limit Optimization, 2026)
