Summary

Final-year Computer Science (AI/ML) student with strong backend engineering experience in building scalable REST APIs and ML-powered systems. Built systems handling 5,000+ requests/min with sub-second latency and achieved up to 30× performance improvements in compute-heavy pipelines. Strong foundation in Data Structures, Algorithms, System Design, and Object-Oriented Programming.

Technical Skills

Languages: Java, Python, SQL, TypeScript

Backend: Spring Boot, FastAPI, Flask, REST APIs

Databases: PostgreSQL, MySQL, SQLite

Tools: Git, Docker, Postman

ML/AI: PyTorch, OpenCV, YOLO

Core: DSA, System Design, OOP

Experience

Peerprep

Software Engineering Intern ***Sep 2025 – Nov 2025***

- Engineered a document detection and perspective correction pipeline using OpenCV to digitize academic marksheets across multiple education boards.
- Delivered 99.98% extraction accuracy and reduced per-record processing time from 10 minutes to ∼30 seconds (30× speedup) for large-scale academic records.

Tools: Python, OpenCV, OCR, Git, GitHub

Projects

Team Lead

CampusHub – Student Services Platform ***Jan 2026***

- Designed backend architecture for multi-service student platform (PG, mess, grocery services).
- Built 58 REST APIs using Spring Boot with JWT authentication and role-based access control.
- Designed PostgreSQL schema (14 tables) using normalization (BCNF) with optimized read performance.

GitHub: CampusHub

DOC-OC – Document Extraction System ***Sep 2025 – Oct 2025***

- Built ML pipeline using YOLO + OCR for structured document extraction.
- Achieved 99.98% accuracy and 30× performance improvement over baseline.
- Integrated FastAPI backend with React frontend for real-time results.

GitHub: DOC-OC Repository

Cargo Laytime – Maritime Automation System ***July 2025 – Aug 2025***

- Built GenAI system to automate maritime SOF extraction and laytime calculations.
- Reduced manual processing time by 50% with full automation pipeline.
- Won 1st place in national hackathon; deployed in industry use case.

GitHub: MariTHON Project

Education

Graphic Era Hill University **Dehradun**

B.Tech Computer Science — Artificial Intelligence and Machine Learning ***2023 – Present***

CGPA: 7.48

Achievements

- 1st Place – MariTHON National Hackathon
- Finalist – HackTheWinter National Hackathon

Competitive Programming

Solved 300+ problems across coding platforms; strong understanding of arrays, trees, graphs, DP, and system design.
